Usability test

Tester name is S.kuleythiran.

Student of ICBD campuses.

Age 23.

Home town Kalutara.

Live in Ratmalana.

Testing 01 – Match between system and the real world

- Courses area is very detailing, I can understand easily.
- Buttons are very attractive and feel like good.
- Footer area, social media link is nice. That eye-catching.

Testing 02 – User control and freedom

- Testimonial image input is having my choice; it's good sometimes I don't like to share my image.

Testing 03 – Error prevention

- Forms are helping to correct my mistake and that showing where I false.

Testing 04 – Consistency and standards

- Cards are clearly understood. Gallery area popup is very nice, I really like that

Testing 05 – Recognition rather than recall

- Gallery filter, I can easy to archive my fever gallery.

Testing 06 – Help and Documentation

- Forms boxes are explaining what i want to type here. That easy to fill that forms. I can understand what type of data needs to fill here.

Testing 06 – Aesthetic and minimalist design

- Contact us form have a map, it very use full to reach the academy. I can validate the location and travels.

Evidence of user acceptance testing

User gives live feedback in real-time. I ask some usability relative questions to gather some information. He smoothly answers to me that feel like awesome. Some of photo evidence here
